Metabolomics Data Analysis Workshop

Short day course

In this workshop participants will be introduced to tools and approaches for processing, analysing and interpreting mass spectrometry data from metabolomics experiments. This will include data preparation, statistical analysis (multivariate and univariate techniques), biomarker discovery, data visualisation and approaches to functional interpretation, including metabolic pathway mapping. The workshop is suitable for established metabolomics users and those new to the field and will be delivered online using Teams.

Date

17th September 2020

Time

10:30am to ~3pm

Course fee

Free (registration required)

Venue

Online via Teams

Registration

jane.itzhaki@medsci.ox.ac.uk

Programme

Lecture 1: Data Analysis

Data analysis exercise

Q&A with discussion

-Break-

Lecture 2: Data

Interpretation exercise

Hands on exercise

Q&A with discussion

Programme lead

Professor James McCullagh

James.mccullagh@chem.ox.ac.uk
